Dave,

Things are real hectic here and I'm trying to get out to catch a plane to Denver. Please responde to the following by the 15th. Send it directly to Stu with a cc to me.

Stu also said the MTL was looking for a statement of work for their new 638 contract with forestry. MTE is not being very cooperative. Do you have anything? Why doesn't Stu have anything. This will be a good opportunity for us to put in language that will require them to follow some standard.

Feel free to talk directly with Stu.

Jay

Mr. West-

This is a followup to our conversation last week regarding the forestry programs we have under Public Law 93-638 contracts with Menominee Tribal Enterprises. During our conversation you informed me that both you and Mr. David Congos, COR were aware of certain matters that may relate to issues of mismanagement, waste, fraud, or abuse by the Contractor of these Trust related programs being carried out under these two major Federal contracts.

I am formally requesting that both you and Mr. Congos provide me with a written narrative disclosing all information that you may have regarding this issue, so that I can take appropriate action. Please provide requested information by September 15, 2001.

Communications on this matter should be held in confidence and limited to yourself, Mr. Congos, and the Supervisory Contract Specialist. Thank you in advance for your response to this matter.

Stuart S. Mani-Supervisory Contract Specialist
